APRU World Institute

Public Health Project

Will focus on establishing a program of research and development to prepare tools for use by health systems worldwide to implement “best-practices” in chronic disease prevention and management through better :

- 
- Risk factor surveillance;
 - Assessment of costs and organization of services;
 - Change management to implement best practice;
 - Monitoring and evaluation

Why we're here:

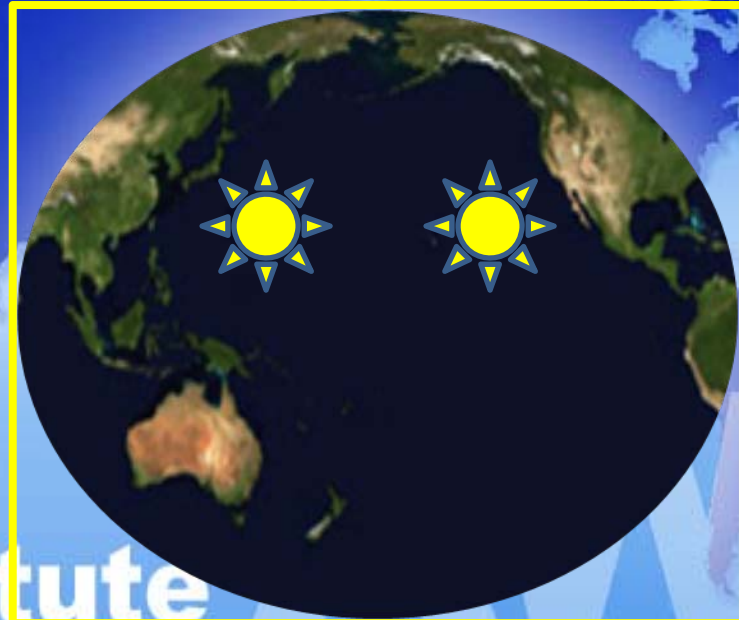

**"The Challenge of Chronic,
Non-Communicable Disease in the
Asia Pacific Region"**

Ultimate goal:

Healthier Asia Pacific Region
